

POLARMOSS ISLAND

USER AND INSTALLATION GUIDE

Welcome to interior design enhancement with Polarmoss!

This installation guide will help you install the Polarmoss Island on the wall.

The Polarmoss Island is an interior decoration product that is handmade from natural reindeer moss.

The moss's journey to this product began with careful hand-picking in the forest. Then the moss was manually colored and preserved, and finally it was fastened with metal hooks to a cork base.

Like reindeer moss in nature, the colored and preserved moss of the Polarmoss Island reacts inherently to ambient humidity. These natural characteristic changes do not harm the product.

To keep your Polarmoss Island at its best, note that

- › The product is meant for indoor use only.
- › The product cannot be placed in direct contact with water.
- › The moss of the product may be touched only with utmost care when the moss is dry. The moss dries and breaks easily when the relative humidity of the air is under 40%. At 40% relative humidity the moss gradually starts to soften. Above 40% relative humidity the moss stays soft and tolerates normal touching well.
- › Placing the product in direct sunlight may cause some minor discoloration of the moss over time.
- › The product does not need any maintenance. If desired, it can be cleaned gently with the dust brush of a vacuum cleaner.
- › Store the product in a plastic bag.

Dispose of the product together with household waste.

Product package content for installation

- › Polarmoss Island; installation plate attached to the back side of the product
- › Wall part
- › Screw and screw anchor

Tools needed for installation

- › Measuring tape
- › Pencil
- › Drilling machine or screwdriver

Warnings!

The product is meant for interior decoration only; it is not meant for consumption and should not be tasted. Due to the metal hooks, the product should be kept out of the reach of children and pets.

Small items and plastic bags are included in the product's packaging; to avoid any danger of suffocation, keep these away from children and pets.

1. PRIOR TO INSTALLATION

- › Make sure the screw and screw anchor are suitable for your wall material.
- › Make sure the wall material is suitable for drilling and solid enough to carry the weight of the product. Be careful of possible plumbing and/or electrical wiring inside the wall.
- › Arrange the Islands, e.g., on the floor or a table, according to the desired design of the installation. You may want to cover the floor or table with protective paper or plastic.

2. INSTALLATION

Insert the screw anchor

1. Measure the position of the hole on the wall.
2. Mark the position with a pencil.
3. Drill a 6 mm/0.237 in. hole at the mark on the wall.
4. Insert the screw anchor into the hole.

Fasten the wall part

5. Fasten the wall part with the screw into the screw anchor. Make sure the wall part is right side up with the smaller side against the wall.

Place the Polarmoss Island

6. Place the Island on the wall so that the installation plate attached to the back side of the product hangs from the wall part.

TIPS FOR USE

The special installation plate of the product allows the position of the Polarmoss Island to be adjusted on the wall.

You can also easily move the product from the wall onto a table and back, as the Polarmoss Island is also a great interior decoration product as a table decoration.

Polarmoss Islands are available in several colors and three different sizes; the shape in each size is slightly different. By clustering them they add an extra dimension to interior decoration.

The Polarmoss Island also fits together well with other Polarmoss interior design products.
