

POLARMOSS SPHERE

USER AND INSTALLATION GUIDE

Welcome to interior design enhancement with Polarmoss!

This installation guide will help you hang the Polarmoss Sphere from the ceiling.

The Polarmoss Sphere is an interior decoration product that is handmade from natural reindeer moss.

The moss's journey to this product began with careful hand-picking in the forest. Then the moss was manually colored and preserved, and finally it was fastened with metal hooks to an EPS foam base.

Like reindeer moss in nature, the colored and preserved moss of the Polarmoss Sphere reacts inherently to ambient humidity. These natural characteristic changes do not harm the product.

To keep your Polarmoss Sphere at its best, note that

- › The product is meant for indoor use only.
- › The product cannot be placed in direct contact with water.
- › The product may be damaged if it is dropped.
- › The moss of the product may be touched only with utmost care when the moss is dry. The moss dries and breaks easily when the relative humidity of the air is under 40%. At 40% relative humidity the moss gradually starts to soften. Above 40% relative humidity the moss stays soft and tolerates normal touching well.
- › Placing the product in direct sunlight may cause some minor discoloration of the moss over time.
- › The product does not need any maintenance. If desired, it can be cleaned gently with the dust brush of a vacuum cleaner.
- › Store the product in a plastic bag.

Dispose of the product together with household waste.

Product package content for installation

- › Polarmoss Sphere; eye nut on the top and bottom
- › Hanging wire and 2 wire clamps
- › Screw anchor and screw hook

Tools needed for installation

- › Measuring tape and pencil
- › Drilling machine
- › Pliers

Warnings!

The product is meant for interior decoration only; it is not meant for consumption and should not be tasted. Due to the metal hooks, the product should be kept out of the reach of children and pets.

Small items and plastic bags are included in the product's packaging; to avoid any danger of suffocation, keep these away from children and pets.

1. PRIOR TO INSTALLATION

- › Make sure the screw and screw anchor are suitable for your ceiling material.
- › Make sure the ceiling material is suitable for drilling and solid enough to carry the weight of the product. Be careful of possible plumbing and/or electrical wiring inside the ceiling.
- › Arrange the Spheres according to the design which you have made for the installation.
- › Remove the temporary cord that is tied to the eye nut to facilitate moving the product before installation.

2. INSTALLATION

Fasten the screw hook

1. Measure and mark the position of the hole on the ceiling.
2. Drill a \varnothing 6 mm / 0.237 in. hole at the marked position.
3. Insert the screw anchor into the hole.
4. Fasten the screw hook to the screw anchor.

Fasten the hanging wire to the Sphere by a loop

5. Thread the hanging wire through the wire clamp and the eye nut on top of the Sphere. Then pass the wire back through the wire clamp to create a loop.
6. Lock the loop by gently squeezing the wire clamp with pliers.
7. Cut off any excess from the shorter wire with pliers.

Hang the Sphere with a second loop

8. Check the desired hanging height for the Sphere.
9. At the desired height, make a second loop in the hanging wire using the same method as described above; do not pass the wire through the eye nut. Make sure the second loop fits on the screw hook.
10. To hang the Sphere, place the second loop on the screw hook that you installed on the ceiling.

Hang the Spheres on top of each other

11. If you wish to hang several Spheres on top of each other, connect the bottom eye nut of the topmost Sphere to the top eye nut of the next Sphere hanging below.

TIPS FOR USE

The Polarmoss Sphere is a great interior decoration product that can also be placed on a table or in a bowl.

The product is available in different sizes and colors. Used in groups, hanging at the same or different levels, they provide a unique aspect to a room or space.

The Polarmoss Sphere also fits together well with other Polarmoss interior design products.
